II, 48 assured' by denocratic prints for their own special convenience, county clerks have the right and autionity to issue certificates of election to successful cindudates to the state legislature of what use or effect is ordinance No II which is a reality approach the constitution of the a part of the constitution is it was passed by the convention and adopted by the people? This ordinarce expressly provides that the votes for minbers of the legislature shall be returned to and en wised that the votes for members of the legislature shall be retrined to and envised by the governor chief justice and the scere tary, or any two of them. Would a not be a strange proceeding for a hour do canvassite votes, as required to live cast for a andidates for the legislature in the respective counties in the last if it was not it a matural consequence if not by explicit the same time empowered and required to anoty provision, to issue certificate of the time of the capuses showed were the riversal to of the capuses showed were the riversal lature and district judges are is clearly state officials as are the governor lightenant governor, auditor, tressurer and other state officers, and it is the hight of absurdly for time or even to suppose that county canvassing loard or a countweler can legilly issue certificates of the or dimance referred to.

For what purpose it may be taked should the votes cast in each county for members of the legislature and district judges be subspitted at all to the state canvassing loard, it not be asserted to the same by appropriate certificates of circuit of the same by appropriate certificates of election? And how could any county clerk infelligently lissue certificates of pleation to

either joint representatives or judges of district courts where the interests of two or more countries were involved? There must be an acknowledged head and conceded authority somewhere and if not nivested in the state cary using hourd, it will then be in order for some profound democratic statesman to come to the front and solve the yearing problem

Under the title "The Making of a Great Magazine," Messrs Harper & Brothers have prepared a pumphlet of some half a hundred pages descript of the history and mothods of their pop aller mentally. A good deal of glorification is multiged in, but this is surely pardonable when we consider the record of the periodical now mainly forty years old. The pamphlet is illustrated by an abundant selection of word engravings from the pages of the magazine. In fact it is chally interesting at a picture book for the periodical has always maint mad the highest possible stand and the great of cellence of American wood engraving at the Irasent day twee not a little to the enter-Irase of this one publication.

PORTLAND, MONDAY, NOV. 25.

THE MUDDLE IN MONTANA

Montana starts upon h r career as a state in a political squabble that promises to last tifi cleared up at the next general election The governor is a democrat, all other offi cers of the state are republicans, and there is a controversy between the two political parties as to seating certain members of the legislature. This controversy postpones the ganization of that body and may I revent

The origin of the distue is tolorably familiar to all readers of a new-papers. At a precinct created where contracters are borning at tunnet through the adount as on the Bozeman-Butte cut-off on the Northern. Pacific railroad, 174 votes were cast and all but three were counted for the democratic ticket. On this vote the democrats claim the election of the members of the egislature from Silver Bow county This clasm if enstained would give them a majority of the legislature and the United States But the republic, nares at this claim on the ground that the woll and court were on the ground that the poll and count were fraudulent, that only thire judges of election were present though the law i quires five, that the ballot one where the votes were taken to a place helf a indie distant, that the openit was considered on secret, that person who applied for sadmission as witnesser of it were excluded contrary to law and that he poll hats were written and the return trade in the hand and the return roads in the hand writing of one person, and that person was neither of the cierks of the election Upon these grounds the vote of the precluct was challenged for fraud and illegality, and the county canvassers refused to count it in the returns Application was made to Judge D-Wolfe, of the territoria court, for a man demus to compet them to count it but be fore this was executed he board or can vassers, consisting of the governor, chief justice and secretary of the territory, had canvassed the vote on the constitution, on state officers and on men bers of the legislature, as directed by an ordinance passed by the constitutional conv. tion had certi fied the ratification of the constitution and issued certificates of election to members of the legislature. This beard was directed by the ordinance to canvass the vote on the constitution, and to curves the returns upon the state officers and members of the legislature 'in the same manner' Inder Judge DeWolfe's mandam is the vote of the precinct was formally counted by the county canvassers. whereupon the democratic clerk of the county proceeded to issue certificates to he democrats who claimed to have been elected to the legisla ture The controversy now turns largely upon the validity of the certificates The mocrats claim that the certificates sened by the clerk of the county are the valid ones The republicans on the contrary, hold that these are worthless and they support their contention by the argument that the constitutional convenien by ordithat the constitutional convention by ordi-tance expressly directed that the votes should be counted and convenies by the ter ritorial or state canvassing board, and that cert ficates of election s_ou d be issued by this pound to members of the legislature They hold that no other officer or board had ary right to issue certific ites to mainters of the legislature; and that the ce-tificates is sued as directed by the oremance mi stad mit the holders to reats in either house until each kouse decides for itself who are en tailed to seats therein

By this argument the democra's are driven to the expedient of denying the va idity of the ordinance passed by the coust, tational convention, which designates the convassing board and directs the manner in which the vote was to be counted But it is mipossible to see why the cordinance s not

as valid as any other act of the convention Though this ordinance is but tem powery, there is another which must stind as long as the constitution is in existence, and though neither, ordinance is the body of the constitut on, both were or defined by the convention and both were ratified by the vote of the people. The Hel-ena Herald says. The ordinances were adopted when the constitution was adopted, and are of equ drailidty. The constitution was monted, and are of equ drailidty. The constitution was adopted on the first day of October and derives its force from that adoption on that date. Though its powers were in absynce all til the assumes of the president spreciam. at on from the moment of that proclama tion leng issued the constitution and ordi-pances become of force from he date of adoption Members of the leg slature are state officers, and there is but one board known to our law as it wonds that has the power to canvas the vote for any state office or issue any legal ce tilicate. The legisstare when organized has bower to go back of the certificates and determine the elec-tions and returns of its members but there is no other power anywhere ' Moreover, it was distinctly declared by act of corgress under which the convent o s in territories were arganized that the constitutional conventions may by ordinance provide for the election of Macors for full state It is proper to mention also the fact that the democra a controlled the constitutional convention in Mortana and that oil was on the motion of democrats that the ordinance directing the count of the vote in this man-ner was framed and adopted. They sup-posed it would be in the interest of their ray and for the same leason the election county officers was orde ed at the time the vote was to be taken on the constitution.
The object of this last act was to pur cut of office as many as possible of county republican officeals, who had been elected at the political revolution of 1883

But the democrats of the legislature refuse to recognize the certificates issued to members elect by the hoard, at horized and directed by ordinance to issue them so the legislature is divided into two parts. The senute is a tie and the republicar heutenant vernor presides with power to cast the stding vote. The house upon the laim of republicans, is republican by about sever majority upon the claim of democrat embers of the two parties do not meet to-They have taken senarate levisla tive halls and the two bodies wil probably keep up a campaign of observation movements during the winter The state in the time, will probably 15t suffer beariously through want of seriously through want of legis lation It can get along c mfortably inder the old territorial laws. The outlook is not favorable however, for .. spiragts to the Diuted States senate

But it would not be we y surprising f the proclamation declare the scats o aft repub-lican members of the legislature vacant and elections to fill then. This however, would pretty certainly obtain the attention ongress which body has power to declare what government is the lawful one in a

"THE OREGONIAN " says the Alpany Demo crat in an unguarded r oment admitted that the tariff was invented for he Eastern that the tariff was invented for he Eastern mornufacturer. That pape dodges our critisism on this remarkable admission which have utely gives away the whole theory of protection. This is only another illustration of the inability or refusal of the Oregon lemocratic editor to understand any thing at all upon this subject. The Orebuxtax's remark was intermed in a large acided in mark was not made in an ung sarded mo ment." at all The tartif was invented and

continued during many years for il elineft of the Eastern minusecturer. Only bla products were on the protected hit. but since the war period the preducer of m terials as well as the minafacturer has been protected. Hence the tailf is not now a fariff merely for the benefit of the I ster a manufacturer. But the demonstrate purple to make it uga n a tiriff for his sole heucht, by cutting off all protection from m termis and still keeping protect of on manufactured goods. The stupidity that is unable or the perversepess that refuses to see the is ess that refuses to see the it But the people see it if the dem om Jeine ocratic editor will not

AN ENGLISH VIEW OF THE CIVIL WAL

Under this title the English General Wolselev contributes to the cu rent number of the North American Leview his estimate of Grant's campaun of 1864. It is not too much to say that General volseles a review 14, from a professional point of view worth less, because it is written from the s and point of prejudice. He has decided in ad vice of his crite ym that L e and Jack on were faultless soldiers and he has written his review down to the level of his freju dies instead of up to the level of n to d nd professional impartiality facts and professional impartiality ten-cral Wolseley in this has a nde a great mis-take a initiake that the great Engishman, hapter did not commit when he wro e his Pen naular Wir? Kipe kad served gal-lanty under Wellington in Spiin but when Name - wrote history he ki ew no diffe ence between an Inglishman and a French man He does not spare Wellington when he altindered her s not strend to give Napoleon, Sputt and Massena their just meed or praise So absolutely just is Nature that his book re-mains the fairest estimate of N-poleon and his great subordinates that ever was writ Napier proved that the English soldier could be lifted by his intellect and his respect for trath far above prejudice Lord Wolseles, it is true, never saw any great milita y operations, much less ever con ducted any to a successful conclusion but he is a soldier of distinguished gallentry and fine military education. Nevertheless his notes on our civil war are absolutely valueless because his prejudice clouds his cyes like a cutranct. He assumes that Lee was a very great soldier because bolding the interior and therefore shorter has be successfully resisted the impact of the Ted Lee s resistance the moment our armies were placed under the command of s military common sense, mora and energy lasted about siz courage and energy lasted about six months. The pounding begin at the Wilderness and it was practically over when Atlanta a continuous continuo Atlanta as captured and Cedar Creek won Beguregard confesses that from a militar standpoint the South, holding the interio

lines ought to have won, and cites the fact that under less favorable circumstances of numbers nations have won their independence Frederick the Great fought Ri sain, Austria, France and Sweden with yistly inferior numbers and won when his only support was England that furnished him with a good deal of money and but few sol diers. The French republic fought Austria Prusua Italy Spain, England and Ho land at one time and won. It is clear that the great generals of history have not won her title to fame by excusing ritimate failure on the plea of having been outnumbered Fred ericl with 30 000 men, routed Daun who had over 80 000, Napoleon over and over again whipped a superior enemy with in ferior numbers and Lord Wolseley attempts the absurd when he tries to lift Les to the rank of the first soldiers of the world in face of the fact that I consided under less trying disadvantages than really grea soldiers have overcome. The plea of infer. ority of numbers for a soldier who stands on the defensive and holds the interior lines will not excuse defeat for under those very circumstances great soldiers have won great pictories and when Lee took the officialive as he d d at Gettysburg and held th arc of the circle he was bedten It is clear therefore that I se was not a soldier of the first ra k, for he yielded under pressure of numbers and resources not as great as have been victoriously overcome by the great sol

diers of the world Secondly General Wolsel-y is not fair to Grant He presends to resort to the Century war papers for his facts Who does be quote as authority on the Federal side against Grant? Mujor General MauMa hon' There was no 'Major General Mac Mahon' Lientenant-Colonel Martir T MacMahon who served on the staff of Mr jor General John Sedgwick of the Sixta corps, is the person referred to He was a gallant staff officer but never commanded even a brigade in action General William F Smith whom Grant relieved from conmand for insubordination, is also cited as authority for the base ite that General Meade deliberately neglected his duty at Cold H ir bor in order to injure Grant. These two men are the only l'ederal authorities, sted for Wolseley seview of Grant's campaigns-a corps staff officer who resigned because his brother fell at Cold Harbor and a sore headed major general, relieved for 1730's ordination and who never joined Grant un'il Cold Harbor When we remember that the history of the whole Wilderness cars paign written by General Humphreys sho as chie of staff to General Meade, but the full confidence of both Grart and Meade was in possession of General Wolseley his selection of "Federal nuthorities" proves not simply prejudice but gross unfair ices General Humphreys was a most accomplished officer, great as an engineer a single officer a tactteian and a corps commander in the field. He is regarded as the most emment and impartial authority on the intics and strategy of the Wilderness cam page for he helped Grant and Mende of re all the plans from May o Septen be The testimony of Sheridan a menious

is also ignored On the Corfederate and the military critics of Grant hat Wolceley calls do not include abl; men Johnston, Longstreet and Heruregard cites General Law who commanded a bil gad in Lee's army And this is the unfar and ignorant treatment of Grant's military operations that is put forth by General seley A Napier would never have love an able soldier such injustice as Wolseld does Grant, and a Napier would have scorned to call obscure and contempt ble witnesses on both sides to the exclusion of all the really eminent conspicuous soldiers who served with Grant or against h m

If they can be secured a course will be staked out just below the White house landing, where the whole race could be seen from the railroad track.

The Kellogg Transportation Company's new boatts rapidly nearing completion, and will probably be done in fifteen of twenty days. The boat is not named yet. Owing to the extreme lightness of its craft, the company hopes to be enabled to navigate the Cowitz the greater part of the summer season. At a two-foot stage of water there can be carried probably about fifty toos. Her normal draft, is but tweys inches. There is plenty of water at present in the Cowlitz, the Toledo still going 10 Toledo, and the Kellorg continuing its usual route. The Bentley, after a thorough overhauling at the East Side yards, presents a handsome appearance. She left vestercary up the river on her first trip with upwards of 100 tons of freight:

The design of the boxes is becoming apparent and the dressing rooms back of the stage are and the dressing rooms back of the stage are partitioned off and the galleries above about completed. The contract for furnishing the building with carpats, draperies, etc., has been let to H. F. Gullisson & Cc. The foyer, aisles and boxes will be covered with rich Moquette carpats, of Moori hilesign, in electric bine and farra cotta solver. The draperies will be jute velours in the same colors and designs as the carpats, and when completed it will be the most richly furnished theater on the Pacific coast. Mr. Fantoniti arrived from Ban Francisco on the last steamer, to superintend wiring the building for the electric lighting, and work on every department will be rushed as fast as possible.

HE PREDICTS A COLD WINTER.

An Aged Indian Prophet and His Psculiar Prophecies A Queer Article of Dict.

Few men are more interested in the weather outlook for winter, that Captain J. E. Lomhard, the ice man.

He was telling an interested group of listeners Saturday about what the Indians at Hood river are propheeying. "There was one old fellow there?" said the captain, and one old fellow there, said the captain, "who, from his thoroughly dred-up and wrinkled face, might have been two or three hundred years old, who said to me: 'Heap co. Heap cold,' Why so?' wrs asked him. Pienty acorns. Always he plenty acorns, heap cold, heap ice.'

"And so I noticed; for the ground under the thick oak grows here the stock of t

the thick oak groves there was almost cov-ered with acorns. The old Indian's theory was, that when a cold winter approaches nature provides for the squirrel, and

big brother, the red man, an extra allowance of the food of the forest.

"Do the Indians eat them? Oh, yes. "Do the Indians eat them? Oh, yes. They took me down and showed me where they take care of the accorns. Deep pits are dut, and in these the indians bury their accorns and cover them ever. They go through some kind of sweating process under the ground, and in the cold meather

they 'make very wholesome and paintable food.

"Speaking about weither prophet:," continued Captain Lomburd, "reminds me that for years ago an old man who lives at Twelfth and Montgomery streets was reiling anchat all the signs politiced to a perfectly open winter. He was an old Oregon weather prophet, and assured me that there would be be cold weather, no snow no ic." The next day a storm came up. The trains were blic chaded on the O. DILIVERING PIPE FOR THE NEW MAIN. How the Work Is Progressing-Excavation for the Tunnel-High Service Reservair-Etc.

The Oregon Transfer Company has been to some time engaged in delivering the in ge cast iron pipe for the new main from our inches, their length is twelve feet and they weigh 2800 nounds each. They have been strung along in pairs, which will neces-si ate a great deal of unnecessary handling of the heavy pieces, and in many places they have already been moved to give dealers access for their delivery wagons to the

The work of laying the pipe was begun at L neoin street, and one block has already been put down. The line runs from Lincoln along Water to Harrison, up Harrison to Eirst, down First to Jefferson, and up that sireet to Sixth, and when Ball Run water is brought in, this pipe will forin part of the life to the reservoir in the City Lark. Of the whole amount of this pipe contracted for, 430 tons, there is still eight carloads to arrive. An Eastern foundry furnishes it at \$-5 per ton, which is 50 cents per ton less than the bid of the Oregon Iron and Steal Comping, which has the contract for supplying 40,000 pounds of T's and crosses. The wrought iron wipe for the line from Lincoln street to Palation hill, contracted for ty Wolf & Zwicker, is being delivered, 800 feet having been strung along, and the trench for it has been dug, but owing to the rain it has not been laid.

a short time since, rouning was joined it except a portion of the sand and mud pumped up from the river. The low service reservoir was cleaned out some time since and some carp were found in it. It came and some carp were found in it. It came near being cleaned out since on the occasion of an old man resident in the vicinity disappearing. His friends set an intelligent dog to track the missing man and the animal stopped at the reservoir. It was considered certain that the man was in the reservoir and a boat, and grappling hooks were procured in a hurry, and an excited crowing athered around the reservoir, but just as the work of graupsing was about to be begun the, missing man was noticed among the crowd of interested spectators, and the search for his damp, disagreeable fremains was postponed. remains was postponed.

COMMITTEES ARE APPOINTED.

Club Will Organize-At the last meeting of the Oregon Albine Club, President D. P. Thompson, by a vote of the members, was authorized to appoint committees to draft constitutions and by-laws government of the different depart-

FACTS AFOUT STREET ASSESSMENTS. Money Overdue for Bewer and Other Improve-

The attention of property owners is called to the fact that the Fifteenth, Market and Fourteenth street sewers, and the westerly extension of the Tanner creek sewer, were accepted some time since, and that the assessment has been made and and that the assessment has been made and only advertised and will become delinquent on the 29th inst, after which, as provided by the amended city charter, assessments will be bearing interest. Property owners in the above cases will have no cause of complaint if they are compelled to pay interest, as the work was completed before the assessments that the levied the alone before it became

ment was levied; let alone before it became delinquent.

The amendment of the city charter pro-

ment was levied, let alone before it became deliaquent.

The amendment of the city charler providing that assessments for street and sewer improvements shall bear interest after they have become delinquent, works an apparent hardship in some cases, where the assessment becomes delinquent before the work has been completed. Most people consider a man a good paymaster who pays for work when it is done, and there have been complaints from people who find that their assessments became delinquent and are bearing interest before the work for which they were levied has been completed.

There are two sides to every story, and there are reasons why the hardship complained of in this matter is in some cases may didnite. When an extensive contract is let, which requires a long time-fortist completion, it would hardly be just to expect the contractor to go on and expend many thousands of dollars and complete the whole work before receiving any of his pay, and under the law no warrants for payment for any part of the work can be issued till the assessment has been levied. To prevent this injustice, the assessment in large contracts is levied somewhat in advance of the completion of the work, and thus it happens that the assessment of some of the property owners becomes delinquent and interest bearing before the work in front of their property is done. The assessment from the that it was the evident intent of the frame a law which will always do justice to all the property owners and the contractor. It appears from the charter that it was the evident intent of the framers that assessments for street and sewer work should be levied in advance of and without any reference to the completion of the work has been ascertained, and provision is made for levying an assessment is levied in, say ninety days, the assessment is levied in, the property is contracted in, and provision is made for levyin

In cases of ordinary contracts in which it is agreed that the work shalf be completed in, say ninery days, the assessment is levied so as to have it payable about the time the work is to be completed, seldom before, and often not till long after. If, as sometimes happens, the work is not completed within the time specified, and the assessments become interest bearing before the work is done, a hardehip is wrought the property owner, and the fault lies with the contractor spaties whom the penalty provided for non-infillment of his contract should be enforced.

forced. In regard to large contracts, it may be stated, that the work on the Johnson creek

sewer is likely to be completed before there is any mancy collected to pay for it, and, if property owners do not pay for work when it is done, they cannot trumble at having to pay interest.

STORIES TOLD ABOUT SHEEP. What Came of Two Balds That Persisted in

Several "sheep men" from the Inland Empire were gathered around the stove at one of the hotels yesterday, discussing the presents for mutton this winter, and wool next spring, and the profits to driving sheep to the Willamette to Winter, and at last they got to telling stories about One told about the ciptain of a schooner

who had a band of sheep on the deck of his vessel. As he was turning and twisting the wheel, to keep the schooner on her course, the old ram who harded the flock, taking

the old ram who herded the flock, taking umbrage at his motions, came up behind him and at one lell sweep butted him over-the wheel. The erraged captula seized his woolly assailant and threw him overboard, when, presto; sway went the whole flock, popping over the rail, one after another, into the sea. Doats were lowered and withmuch labor, a portion of the flock was saved. Another told a story which illustrated the same follow-my, sader trait in the character of sheep. At a poit on the Sound, one evening just after the deck hands had got all the freight stowed away, there came down 500 sheep to be put on bourd. All hands were rexed because of the delay and trouble connected with shipping them, but finally a pen was made of huidles retween decks, and a gangway rigged, land in the dusk all was rendy to take the sheep on board, and they were started down the gangway. The first one, as he struck the ceek, saw an opening in the other side of the boat across which a hurdle had been placed. Instead of going along 40 the corral pre pased this sheep made a running jumb, deared the hurdle and landed in the sidt chuck alongside. Everyone of the band followed suit, and in a short time 500 sheep were struggling in the water. The captain, having seen the last one go down the plank, yelled out, "all right sir; send them lown." "Send em down, "coared the captain, having seen the last one go down the plank, yelled out, "all right sir; send them lown." "Send em down, "coared the captain, "haven't you the sheep down thore?" "Not a sheep, sir;" was the reply, and investigation showed that there was not a sheep on the boat. The ceptain could not delay any longer, and so steamed away, and only a small number of the sheep

Marquis of Queensberry rules, of the 16th of hat August.

He says he had won the fight but that the officers of the club interfered and stopped tha contest against his protest and to his damage in the amount mentioned in the couplaint. The astute Thomas evidently thusks that the club will prefer to comprenise with him rather than engage, in a fret. As far as the breach of con rac goes the club evidently has the best of it, as lail pagiliats who sign with the Cult formin Clubagree to bus in a manner satisfactory to the directors, and the engagement between Wirren and Murphy was cestainly not with the constant called for. The case will afford ine play for legal ingenuity, as several lice poluts are involved, actiguitarly that in the whether a contract for a boxing match is a yalld instrument on which a suit cas be legally brought.

Similiyan, Jackson and Dempsey are three. If the most accommodating lighters in the profession in the matter of consenting to energy in actual buttles. Sullivan has never at the deal of the most accommodating the sullivan has never the fact a fight with a sullivan has never matches. Jack Dempsey is willing to light a man every mouth from now till February if the California club directors so desire, and in March will meet young Mitchell if the match cannot be made for an earler date.

Muldoon has contradicted the reports that Mildoon has contradicted the reports that he had also ken disparantingly of Sullivian. money, as a general thing show the least inclination to make investments of this kind, from which it is safe to conclude that there is not much to be made in building houses for and, or at least, that there are better opportunities for making money in other ways. Only those who are in the business know the trials and troubles of those who rent houses. The renters have trials and troubles and complain of hard-hearted innulords and extortionate rents, and of unwillingness to make needed repairs, and as there are more often heard and, better understeed. The other side should have a show, and a landlord who asked a reporter to "listen to my tale of woe," told the following story:

"One of my tenants came to me and wanted a new stak in the house he occupied. I said the sink he had was good enough, but he said his wife wanted a steef one, and it would only cost \$2.50, and if I would pay for it he would pay for jutting it in. I like to accommodate my tenants, so I told him to go ahead. A week after, a bill was presented to me for \$18 for a new sink and putting it in. I referred the man tomy tenant said he would not pay it. I said I'w wanted as my agent in having the northy and after consulting my lawyer, I found he was correct; that under the lien law the tenant acted as my agent in having the work if done, and it suppose I shall have to resort to the law to got him out then, and will be cheated out of a month's ront."

Another lundlord had a thic of woe to tell. He said: "I had a bill of \$16 presented to me for putting a door in a partition of one of my houses. I refused to pay, as I had not authorized, the work and referred the man who had employed him. He refused to pay, and I hook had a line on my houses. I refused to pay, as I had not authorized, the work and referred the man at my tenant who had employed him. The machine consists of a receiving hopper, vibrating inclines with amagamated rolters, which revolve in vais of mercury. The placer material is placed in the hopper, thence let put in a steady stream upon the inclined vibrator, they motion separating each particle of matter, so that when the matter drops from the incline to the surface of the rolter, it immediately comes in contact with the mercury brought up from the vat below. The rolter thus retains the metal as it revolves and carries it down into the pan of mercury below, where there is an automatic spouge soraper, being submerged in the increury, which cleans the rolter at each revolution.

The meroury thus retains the gold, silver, in or copper, the refuse fulling off from the face of the rolter, making a complete separation of the matter tailing upon the face of the rolter.

THEY ARE PIOUS-PACED IMPOSTERS. Praudulent Belieftors Gathering Donations for Bapposititious Needy.

It is reported that several fraudulent solicitors are making the rounds of the city, ostensibly in the interests of charity, but, in reality, for the purpose of self aggrandizement. They gather old clothing and other donations for supposititious destitute perdonations for supposititious destitute persons and them sell them to second-hand dealers for their own benefit. In this way they make from \$5 to \$20 a day. The city board of charities desire the public or refuse these solicitors donations and report them at once, in order that their identity and real objects can be ascertained. While, as is customary, some of the hospitals and orphan asylums occasionally call upon the public for donations of clothing, etc., the city board of charities is well able to supply all destitute families brought to their notice. That is what the board is organized for.

These fraudulent solicitors have only hit upon a means of begging under the respectable guise of obarity, and they should be suppressed. So much, however, his already been said about dishonest mendicancy, that it is a wonder that anybody having common sense and only britishing judgment, should be taken in by these pions-faced imposters. The field in For land is ample for charitably inclined people to give their sniphly to deserving institutions and individuals.

A ORCHL ON RUSSELL STREET. The entire length of Russell street, excepting Nob Hill, is in a most fearful conditionalmost impassable for teams. This does not reflect credit on our present connoil, but such is the fact. Should some popular quack doctor present be mud baths as a sure cure for all ills that the human flesh is held to, the ecould not be found a more favorable place than on this street to take a plunge, in its present condition. An enterprising merchant at the junction of Kussell street has placed out signs in front of his store, "Life prejervers" to et. Last whiter this street was in the same condition, and it was hoped that some notion would be taken to make this main theroughfare passable; but spring will have to come now before anything effectual can be done. It is thought that the taxpayers' money could be much better used by keeping the main travoled street in good condition than paying it our for surveying and law suits. Monigonery slough will be heard from next. The entire length of Russell street, except-

NEW YORK, NOV. 25. The receipts of spring wheat at the Northwest ports continue about as heavy as heretofore. The export demand, which has increased noticeably within a fortnight maintains only fair proportions. Prices, however, remain hardly steady for flour, and \$6.0% of a cent lower for wheat, with cable demand light. The rumors about the recommendations on the subject of sliver legislation that are anticlipated in the forthcoming report of the scoretary of the treasury to congress have had a decidely strengthoning effect on the silver market. While definite information is withheld, report is busy with the matter. The idea is that action will be urged in some form, either to increase the monthly coimage of silver dollars under the Blund act, or to provide some method by which the silver builton deposited with the treasury can be given quality as a basis for circulation, and has had a naturally strengthening influence.

NEW YORK PROBUCE MARKET.

Copper—Brisker and stronger; lake, Decomber, \$13 25. id—Dull, but steadler; domestic, \$3 8214. Quiet and firm; Straits, \$21 50.

Lead—Dull, but steadier; gomesuc, 19 2272.
The—Quiet and firm; Straits, 212 50.
Bar filiver—9035.
Petroleum—Opened stronger at 110% but after moving up slightly gave way under selling by the Standard Oil brokers and declined 4 cents. A slight reaction then followed, on which the morket closed steady at 106%. It is thought that decline is due to the desire of the Standard Oil Company to reduce the prentum paid in the oil fields and take less for certificates in the speculation market. There was no news in regard to the production to affect the prices. Stock Exchange—Opening, 106%; highest, 109%; lowest, 106%; closing 106%. Consolidated Exchange—Opening, 106%; flowest, 106; closing, 106%. Total sales, 2,128,600 barrols.

BHIPPING INTELLIGENCE.

The British ship Eskidas, unable to get a charter at Puget sound, has obtained a chanter at Portland. Some days ago one of the O. H. & N. tugs was een round after her. The tug arrived with the ship at Astoria on Saturday. The Eskidale is chartered to the Portland Flouring Mills. Thus the advantages of the Columbia river in competation with Puget sound find practical demonstration. GENERAL NOTES.

The Port Adelnide finished loading flour at the North Shore dock yesterday.

The Oaklands, which has been anchored in the river for the past few days, will load flour at the North Shore dock.

Assistant Attorney General for this department, I have received his opinion thereon.

This holds that under sections 3703 and 5418. Revised Sixtues, it is unlawful to bace advertisement on stamps in the number suggested. He assumes that possibly your largh adviser considered the provisions of those sections as applicable active offenses committed by in citizens not in the public service, but he holds that the law makes no exceptions, and that it would be goldens unlawful for the postmander general to use the stamps of his department for advertising pusposes, after for public or private sine; as for all of the postmander general to use the consent to uch use by any piler person, with or without compensation, will not make the act lawful.

ANGER.

So says Chief Scannell, and with his long and varied experience in matters pertaining to conflagrations, we naturally give him the benefit of the doubt. We, as tax-payers, property-owners and citizens, are deeply interested in this in-pending and sure-to-come danger. We late to feel that when we leave our cosy homes in the morning that there is any such a thing as their being in ruins when we return. The cry is, more hose, more engines, more men that can be enlisted and paid to remain at the ergine-houses of the fire department, which means more strength to aid in putting down this terrible conflagration when it does come. Now, strength is what everything has to have to do service in a greater or less cegree. Man acquire a this much-needed strength by various means. Exercise, plenty of fresh air, good food, eaten at regular intervals, and the use of the GREAT SIERRA KIDNEY AND LIVER CURE. A man may look ever so healthy and think himself in the best of conditions, and yet have diseased kidneys. Anatomical science treats that he kidneys are so poorly supplied with herves of sensation that when disease first starts they can sound no alarm. For that reason it behooves us to be very watchial, and by the use of the never-falling remedy, THE GREAT SIERRA KIDNEY AND LIVER OURE, keep these inportant or degree. Man acquire at his much-needed

AFTER GLADSTONE.

Gladstone is in his 81st year, and though a wonderful example of mental and physical vigor for his years, he can not, in the cal vigor for his years, he can not, in the course of nature, much longer remain a leader; in English politics. A few English statesmen have retained their faculties to a statesmen have retained their raculties or greater age than 'Gladstone, but not their leadership. Lord Lyndhurst poke in de-bate when over 90, but he had long ceased to be a leader. G adstone may live ten years longer, but as a leader he must soon abdicate. After Gladstone there will surely be a readjustment and reformation of parties. Continuity to Provide the Continuity of the surely be a readjustment and reformation of parties.

Graffinde to Gladstone for his devotion to home rule will keep the Parue lites during.
his lifetime faithful to the libera's; but after Gladstone ceases, through the infirmity of advancing old age; to be a political lender, there will be some radical changes in the sherp will be some radical changes in the facel of English politics. After Gladstone will come Labouchere, a balder and less conservative statesman than Glacstone. With Labouchere, Irish home rule is not the overpowering subject of agitation, Gladstone voted for the royal grants, while three-fourths of his ordinary supporters voted with Labouchere against them. Sir William Harcourt and most of the Gladstonian exministry voted with Labouchere and against Gladstone and the Parnelliles who voted with the tories for the royal grants. with the tories for the roy il grants.

with the tories for the royal grants, inbouchers expects a Gladstonian majority in the next parliament and thinks the radicals will make up a larger majority of the liberals than at present. He favors the passage of a home rule bil for Ireland, with the retention of Irish members at Westmin-ster; and this done he will insist on the exeution of his own pet rad cal measure, viz the abolition of soplemial parliaments, and a reversion to the triennial parliaments which existed under Queen Anne. This measure would make it impossible for an accidental, trans.en; majority to thwart the ull of England for years.

abouchere would also put an end to presestate in more than one, parliamentary district. Having done this Labouchere would not only disestablish, but also disendow both the church of England and the kirk of Scottend. He would also make a radical, revoutionary alteration in the tenure and occupation of land.
The reign of Gladstone, the conservative

liberal, is a glorious, our that is soon to set in death or political retirement, and then will come the reign of Labouchere, or some other liberal who will make tory Eng-land sigh for Gladstone even as Catholic ighed for Henry the Fourth when it awest drops of biold under Richellen and Mazarin. The racicals under Labouchere, or some other leader, are sure to come into power at no distant day, for under the latest extensions and readjustments of the franchise in England suffrage as one any universal that the victory of the English democracy close at hand.

HENRY M. STANLEY.

The great African explorer, Henry M. Stanley, was born, hear Denbigh, Wales, in 840. His origina name was John Rowlands, and he was an inmate of the poor lands, and he was an inmate of the poor-house of St. Asaph; from 3 years of age until he was 18. He sailed to New Orleans in 1856 as a cabin boy; and was adopted by a merchant named Shanley, whose name be assumed. His bruefactor dying, Stanley went to Californ a, where he led a roving life among Indians and mirers until the civil war broke out, when he enlisted in the Confederate army. He was taken prisoner and then igned the Federal navy, serving Contederate army. He was taken prisoner and then joined the Federal navy, serving as acting ensign on the grabout Ticonderoga. After the war be joined the staff of the New York He kid, and in the capacity of correspondent hecompanied the English army that under General Napier captured Magdala, the capital of Abyssinia, in 1868. In March, 1871, he went to find Livingstone, who had not been lieard from for two years, and found him November 10, of that year, on the shores of Lake Tar gauvika.

on the shores of Parto Hr ganyika.

Stanley sagaciot sly assumed, when he revisited Lake Tangunyika in 1875, that its waters must by periodical overflow find their way into the Congo, and this view was confirmed in 1879 by another traveler who found the river Lukuga flowing with full hanks and discharging the waters of the lake banks and discharging the waters of the lake into the Lualaba, of upper Congo. In January, 1887, Stanler started from London to find Emin Palsna. If a embarked at Stanley pool on the Congo. April 30, 1887, and has: been absent in this miss on about two years and nine months. From 1868 to the present date, with the exception of his periodical visits to Europe to report the results of his explorations, Stanley's viole life has been pent in equatorial Africa.

AN ELOCUTIONARY CONTEST. The old days, wherein controversy was

busy and heart burnings were rife con-cerning the important question as to who was entitled to see "head mark" in the first spelling class" of the district school, that have been in ide concerning the award of prizes in the recent High school elecution contest. The subaued din in the little red schoolhouse of the long ago as a brightsoundinous of the hole ago as a bright-oyed little girl stopped above the reputed "best speller;" the brighting, defiant attifude of the latter as his churlishly yielded the place, declaring as he did so that he had spelled the word "that very way;" the timid grace with which the veter, not "because she had honestly wen it, stood at the heal of the class until she was compelled by the rules to "go foot" and give the rest a change; the trata declaration of the committeeman that "his hop had not been fairly desit with," and the wrathful chorus from the boy's side that "the master was partial to the gire," are wall remembered accompaniments of this tempest in the village school of a third of a contary ago.

What reminders of it are the undignified assertions, innuer does and charges of igno-rance and partiality, to which this public has been treated by correspondence through THE OREGONIAN for a few days pass the "because-she-ragin feature has been duplicated, carrying the public back to the time when a knowledge of the "three R's" was considered all that was necessary in the

"THE MANCHESTER MARTYRS."

Our dispatches of Saturday appounced Our dispatches of Saturday announced that the English government had forbidden meetings in Ireland in memory of the so-called "Manchester martyrs." The story of the Manchester martyrs, as itold by Justin MacCarthy, is this: Two Fenian prisoners, named Kelly and Deasy, were being conveyed in the prison van from one of the police courts to the borough jail to await forther arguments. On the way the year further examination. On the way the van was stopped by a number of armed Fenians, who demanded the surrender of the prisonors. They surrounded the van and endeavored to break in the door of it. The door vas locked on the inside, and the key was probably in the hope of blowing off the lock.

This was the opinion of one, at least, of the police who gave evidence—and poor Brett was just in the way of the bullet. The unfortunate policeman, who was only preparing to do his duty bravely by refusing to give up his charge, and by defending his position to the list, received a wound, of which he died soon after. Tue doors were then opened, a woman prisoner in the handing out the keys which she found in the pocket of the unfortunate officer, and the prisoners were rescued, were hurried away, and were never after seen by English officials. The principal rescuers died for them Several men were jut on their trial for the nurder of Brett. Five were found guilty; their numes were Allen, Larkin, O'Brien, Condon or Shore, and Maguire. Allen was a young fellow—a mere lad under 20. Maguire was pardoned, for he was arrested by mistake and proved an alibi. After his sentence, Condon was pardoned, through influence of our government as he was an American citizen. The other three were ex-ecuted November 23, 1837, despite the fact that John Bright, John Stuart Mill and the poet Swinburne t-ed to secure the com-mutation of their senter ce.

THE MURDERER'S ADVANTAGE.

The sheriff of Grant county has officiated at two executions within the present year, the last being that of Peter Sullivan, who was hanged at Canyon City on the 15th inst. for the murder of John Bronkes. The de-tails of the crime show it to have been a most atracious one; the evidence proving that the victim was deliberately shot while asleep, the only provocation being that the murderer had been called upon to work for his own maintenance after his victim had hospitably given him shelter for some weeks. He made no plea for mercy, expressed himself as preferring execution to a life sentence in the penitontiary, and, though expressing no regret for the deed which he had commit-ted, he is on record as having "gone to heaven with his siris for given"

Shocking to every impulse of humanity as is such an end of human existence, even the sentimentalist must adulit that in an orthodox sense the murderer had a vast ad-vantage over his victim. The latter was sent to his last account without warning, by a means not less trigic and violent than that which furnished he former his passports Hence, if the Christian has any tears to shed, such tears should fall for the sinner whose hurried departure precluded all possibility of a preparation which we are assured is necessary to a state of future happiness.

Aniaccount of a hanging with such account of the control of the control

paniments of Christian resignation and hope recalls the recital of a floubled state of mind in which a wife-murderer upon one occasion went to heaven from the gallows. Awakening from a drunken stupor, clamoring for food which his wife did not have to give him, he seized a hatchet and dealt her a blow for her improvidence that killed her instantly. Through the regular ministrations of the clergy and the visits and projects of the women while in prison, he projected the assurance that his sins were to given, his only regret in dying being that his/poor wife, having been cut off in her sids, he would be

uable to meet her in heaven."

In the absence of evidence in the case, we are led to believe that the murderer executed at Canyon City a few days ago rather rejoiced that he was going where the unpre-pared soul of his victim would not be per-mutted to come with reproduces for the hase ingratitude with which his kindness and hospitality had been requited in the little cabin in the Pine Creek solitudes.

THE SENTIMENTAL VIEW.

Senator Hoar, in the North American Review, asks the questions. cans in to Stay?" He answers it in the store or postoffice. In the meantime we are affirmative, and rests his faith largely on within a few days of Thankegiving without the popular confidence that is inspired by the record of the republican party in the We do not share this confidence no less the record of the pastis sustained by the performance of the future.

We are a very practical people. An East-

ern man who comes to Oregon with a record of "belonging to good family" and "in good repute with his neighbors" is not fully trusted until his performance at the West matches his reputation at the East. The past record of the republican party does not burt igbut helps it; but the past record will not avail the party anything against the con-sequence of poor, mediocre or unworthy present performance.

present performance.

Every man has a good character until he loses it, and the republican party can not successfully plend its former reputation if it ever loses it or falls below it. The issue is and will continue to be the thriff for many years, and on that issue parties will rise or fail. If New England manufacturers continue to scream for raw materials, for their industries Massachusetts may some day imitate Connecticut and vote the democratic ticket. In any event we may be sure that present issues of a political and non-sent mental character will take the country raththan appeals to the past record of either. party. The era of sentimental politics is over and that of purely practical "pocket politics has begun.

NONSENSE ABOUT "BETRAFAL."

A widow of Southern origin, intelligent, well educated, 30 years of age, the other hyemurdered a prominent business man, also of Southern origin, or Fulton street in New York city. The phalof the womint whs. "That man betrayed me and I sho him." When this woman was "betrayed" she was, by her own confession, 26 years of are and had been a widow six years. She claims that her "betrayal" was originally effected by "drugging." Nevertheless she remained content with this 'outrage" and was her "drugger's" mistress nearly tour venes. '

When an intelligent widow of 26 years finds that she is a "wronged, belrayed woman," whose fault is it? She can not be "betrayed or wronged" in his way, except when she consents to "betray herself." Bhe can 'not plend youth, inexperience, ignorance; she can not plead "drugging," for she could not have been "drugged," unless she had been drinking wine in clares where n modest woman goes; and the probability is that she never was drugged, for she was con-

complaint, the mistress of her "drugger." When her lover deserts her she then brings suit, then complains and finally vindictively

As a matter of common sense, was this woman any better, any less responsible any less guilty, any less worthy of denunciation than the man she murdered? Suppose she had desorted her loyer and he had sho her, what there? When the mand would und neserted ner lover and he had shot her, what then? Why, then the world would have hastened to hang him. The world justly makes a distinction between a young, ignorant, inexperienced, because immeture, girl who is corrupted by a licenticus man of the world and the world world and the world the world and a mature woman, especially if she has been married, just as the world makes a distinction between the first their of a beardless boy and the crime of a mature professional burgler. There comes a period when every man and every woman cannot claim, much less expect, clemency for crime or the score of youth, inexperience, ignoor the score of youth, highperance, yarden or "berryed affections," and in "common sense it seems that a widow of 26 is no more proper offect of legal or rocal elemency when she commits a crime in the name of "betrayed affections" than her mule paramour would be if he should shoot her on the paramour would be if he should shoot her on

the pica that are had "desorted" him.

No sympathy, however, need be wasted on
the man whom she slew. If such results were more commonly the outcome of illicit and immoral connections, the danger might be a proper deterrent, and decency and morality would find an auxiliary of par-

GEORGE H. PENDLETON.

The death of George, H. Pendleton is announced. For many years he was a demo-cratic politician of great note, but latterly has not been an aggressive partisan. The most conspicuous portion of his career was that between 1855 and 1865, during which he that between 1855 and 1865, during which he was an indefatigable supporter of sinvery, and a persistent opponent of the war for Union and freedom. He came of Southern stock; was born in Cincinnati in 1823; was elected to congress in 1856, and continued in that body till 1865. He was the democratic candidate for the vice presidency in 1864 on a letter that propuncial the war. 1864, on a platform that pronounced the war a failure demanded immediate cessation of ostilities and proposed surrender to the rebellion. As a representative in congress he spoke and voted against the proposition to submit to the states the amendment to abolish slavery. He was a candidate for governor of Ohio in 1860, but was defeated, and in 1878 was elected to the United States senate. Latterly be was less acrimonious and extreme in his partisanshin, and fell-into a sort of disfavor with his party in con-sequence, so that in 1834 his claims to a rection were set aside, and the seat was hought for Payne, the present incumbent. In 1885 President Cleveland appointed him minister to Germany. He was a man of high standing in his party when championship of slavery, opposition to measures for subjuga-tion of the rebellion, for preservation of the Union and for reconstruction of the conquered states was the basis of democratic policy, At the same time there was less of vehem-ence and bitterness in his nature than in most of his coadjutors of the time.

VINDICATED AT LAST. :

It is gratifying, amid the chagrin of re-publican defeat in Iowa and Ohio; to learn that so many patriotic and self-sacrificing statesmen, together with their "viewa," have been "vindicated" by the result. First appeared John P. St. John, with the benevolent smile with which he is wont to great clent smile with which he is wont to greet the poor toper who writes his name to the total abstinence pledge twice a week, declaring that himself, the W. C. T. U., prohibition and the third party are "vindicated." Close upon his heels treads Grover Cleveland, late president of the United States, and with his heavy old no quivering with suppressed gles, amounces a "vindication" of his tariff policy through the defeat of Forsker and the republican rout in Iowa: and lastiv. the republican rout in Iowa; and lastly, Corporal Tanner walks dp with the signifi-cant gest of a wounded soldier and an-nounces a complete "vindication" of hin-self and his methods as commissioner of pensions. Other self-satisfied "cranks" are still to be heard from. Why are Brother Dimick and Brother Miller, of Oregon, and Belva Lockwood, and Dr. Mary Walker, of Washington City, silent at this opportune moment, when "vindication" is so plenty and so cheap? And his excellency, Governor Pennover? Does he not see in the resuit of these elections the full vindication of s policy in regard to the Portland water ii? Modesty should not deter these friends from speaking out and letting the world know that at last their patriotic and public spirited methods are appreciated.

The aged Indian significantly points to the bountiful crop of acorns and hazel-nuts and predicts a cold winter. He Is Charged With Trying to Pass a \$10 Counterfelt Bill.

Yesterday a young man, who has been driving milk wagon for a Mrs. Larson, of South Port and was arrested by Dopaly United States Marsh. I W. Roberts on a charge of passling a counterful to bill in Lucas county, Obid, some three cers since. He was arrested there and incliced by the grand jury, but disappeared before his trial and up. His name is Rule Suwyer. On the 2d of October the authorities at Teledo, Ohio, wrete to Marshall Myers, of this city, acting for hit he cicumstance, and also seen a copy of the indictacen. It was supposed, so the letter stated, that Sawyer was flying in this city mader his true pame, and was driving a milk wagon. cumstance, and also septe convol the maternon. It was supposed, so the leiter stated, that Survey was diving in this city under his true pame, and was driving a milk wagnu.

Marshal Myers luraed the matter over to his deputies, who conceeded a plan to find and capture Sawyer. On October 31 Dennty Charles K Watt deposited in the poetofiles a registrated eccay letter, addressed to Ruje Sawyer, and instructed the olerks of the office for another jim whenever the person addressed should call. The decay letter lay to the office uncelled for until yesterday morning, when, at the hour of 8 octook, a man dynered did not the olerks of the office of the olerks with the first state. He was told to call again in a few minutes and it would be ready for him. The deputy was soit for, but he ready for him. The deputy was soit for, but he letter by a clerk who have been and was given the letter by a clerk who have been of the major and out on the run aid overhauled him at the countrof First and Yumbill streets, with the latter in his head untopened. He had also another letter from the East directed to fluid Sawyer, which he now asknowledges to be his right nane, but he neather that the wrong man has been cantured Marshal Myers has no doubt about the prisoner being the right man, and immediately upon his capture telegraphed the marshal di Toledo of the hartest and asked for other information on which to hold him. It is likely that either Deputy Walt or Deputy Roberts will start in a day or so will him.

SE TALKS "FAIRHAVEN" NOW. J. F. Wardner Says the Beston Mine Will Equal the Bunker Hill and Sulivan.

In the Esmond lobby yesterday afternoon satiff. James R Wardner, the noted maning man, James R Wardner, the noted mining man, nerly of Wardner, Idaho, but now halling "We have a booming little place up there, ' said Wardner. "Since I went there, October 10 we have organized a national bank, electric

light plant and waterworks. The Fairhhven Iron light plant and waterworks, The Fliranden Irda and Sized Company, at the head of which is Nelson Bennett, are erecting a large plant. Next to their whereas are those of the great lumber mills and warehouses of General Russell Agist, of Michigan. Cost, iron, Ember and marble exist in almost here house they house they house they house they house they house they have they have they house they have have here have have here have have here here.

all probability next summer will see connections made with the Mantoba and, Northerr Pacific.

"But the most wonderful thing about the country is the Boston nine, of which hardy any one knows, as yet. On the evening of the 9th of October, two men, named W. I. Rouse and E. D. Rouse, no-relation to each other by the way, came to me nod reported a good flud seventy-five miles from Pairhaven, and wanted me to come up and look at it. I did so, put a man out there to investigate the discovery. He substantisted their claim, which had been of a 9-loot year averaging 9p per cent. lead and 36 ounces alived. I immediately made them a proposition, which they accorded.

"By the terms of our contract, I begin as soon as work can be done in the spring and take out 50,000 tons of ore. They pay me 5 per ion or the concentration of such ores as need it and one-half the profits of the property. The cres of this mind is free from sine and intomy, and therefore a most designable gre for smelters. It carries a large per cent of irot.

"EXTIMATING HIS PROPATS. ESTIMATING HIS PROFITS.

, "A ton of the concentrate will run 70 per cent in lead and forty ounces silver. Estimating the value of lead at deaths a pounds, indistinct at 90 cents per ounce; such a concentrate would thus be worth \$90 in San Francisco. The total charges for freight, inding and treatment will not exceed \$22 per ton, leaving the very elever margin of \$90 per 100. per fon.

Now, with an apparently inexhaustible supply, anybody can figure it out that after the mine has been funning two months, it ought to produce at the rate the Eunker Hill and Sullivan did, which was forty tens of concentrate a day. This rate of output would not \$2400 a day. The mine is but seventy-five miles from Fatriayer, at an attitude of 7000 feet.

Commission dealers complain of a scarcity of turkeys in this market. There were plet by coming in ten days ago, and they were setting for 13 cents per jound live weight. Note they are 15 cents per pound live weight, with an upward tendency. The chief source of supply for this city of turkeys, venison, watermetons and peaches is Southery Oregon, and now the California people draw largely on that section for turkeys, and the dealers on the Sound who have become drawn jupplies from this city, have gone to dealers of the Sound who have one count of the dealers of the sound who have some the dealers of turkeys, paying twenty contains a quantities of turkeys, paying twenty cents are pound dreased.
It is going to be cold weather—snow on the ground—it, Portland gets let in the matter of thatkagiving or Ghristmas turkeys, and it may be confidently expected that a supply will turn up from some quarter even if our dealers may not have made contracts for full supplies.

Thanksgiving day would be robbted of its principal charm if a turkey dinner was not forthcomplay of the particle of the principal charm if a turkey dinner was not forthcomplay of the principal charm if a turkey dinner was not forthcomplay of the principal charm if a turkey of many which the same are nightly scarce in Forthund and the regions round about, could be truly thankful on Thanks-styring without turkey for dinner.

A BALOON BURNED OUT. C. F. Hoecker's Place of Business Cutted by

Flames Yesterday Evening. At 6:15 o'clock last evening fire was discovered in the rear end of a saloon connected with a beer garden and dance hall on the least side of First street, between Hall and Lincoln. The place was conducted by C. F. Hoecker, and the saloon building and contents, which were valued at about 5500 are a total loss. No Insurance. ing and contents, when were tasks.

Soo, are a total loss. No insurance, and burned like tinder. Hoecker, in his excitement, forgot all about his cash in the till and sleeplur, apart ments, and also his pet dog. The latter was burned to death, but after the flames had been exhinguished, the cash was recovered. The origin of the fire is unknown.

A RATHER PECULIAR CASE. 8, J. Egbert, an Old Commiss on Merchant,

Meets With Quite a Surprise. About a month ago S. J. Eybert, an old commission merchant, left this city rather abrumty, on a business trip, as he claims. In his turn by all time was J. A. Magnire, whose wages had not been paid. Trinking that his temployer had "akipped out," the clerk proceeded to sell out the stock and store hixtures, which all do not realize a great deal, according to his story.

Recently Egbert returned to this bity and found that he had no place of business. He proceeded to Justice Tuttie's court and sword but complaints against Magnite and W. E. Sperry, charging them with larcepy. The latter, who is an expressman,

Conversation 175 Subjects.

The Youth's Companion does for hundreds of thousands of people in America what no other paper has ever attempted. It takes every great question and clearing it of all wordiness, all partisar ship, all irrelevancy, and all disputation, presents to its readers the plain facts about vital issues, in a form suited to easy assimilation, uncolored by prejudice and scrupulously just,

During the year 1890, there will not be less than 175 of these model Editorials. Is it not worth the price of one cent each to clearly understand all the intridacies of these great National Questions. At the end of a year will it not be worth \$1.75 to you to feel that you can corverse intelligently on the 175 important subjects which have been uppermost in the public mind?

No one can read these interesting weekly Essays for one year and not be a changed person. The vision will be broader, the mind clearer, the analytical instinct developed, and the judgment more discrimi-

Thousands of interested persons from every state in the Union are now sending us their \$1.75 for these Editorials during the year 1890. Is it safe to delay your decision? Are you sure that it will not be forgotten? Will it not be wiser, as you finis i these lines to send your \$1.75 to

Bor Besouroes, Industries and Rapid Development-Buenos Ayres With a Population of 550 000.

Mr. R. Francis, a formes Portlander, returned a tow days since from Buenos Ayes, Argentine Re-public, where he has been engaged during the past three years as manager of large lumbering and planing mill, employing over 500 has da. Mr. and planing mill, employing over 500 has da. Mr.
Francis is very much taken, up with this enterprising republic in far off South America, and evidently believes that she has a great future before
her. The country has made reharkable progress
during the partiew years, he said, and is but now
on the eye of a new ora of still greater upprovement. People are going there from all quarters
of the globe, and on all sides are seen evidences
of push and enterprise.

WHENCE COMES THE LUMBER?

of push and enterprise.

WHENCE COME: THE LUBBER?

As there is little or no lumber in Argentine Republic antiable for building purposes, the country is entirely dependent on the shipments from when quarters "There are but two varieties of native wood," said Mr. Francis, "that me at all mad in the construction of bonses, and these are naed only to a very limited extent. The species I refer to are the digaroya and the lapacha. Both are the hardest kind of hard wood, and, owing to the difficulty of working help are only used for door and window frames. They are only used for door and window frames. They are only used for the manufacture of furtifure.

The consumption of soft lumber in Argentine Respublic is about 100,000,000 feet annually, and nearly all of this is shipped from Maine, Vermony, New Hampshir's and other in for reason why this northwestern country should not come in for a share of this grade at codistanticas. The trip around the Horn the perilous one, and, bying to the proyating and storms, which can always be counted on, fraught with much danger. The completion of the canal will open a new that not of trade that the Northwest right necessarily beneat by Lumber can then to taken to points on the Emistern coast of South America without doubling the Horn. This will be a saving of time and expense and will en able this section of the country to compete with the New Englard states in the jumber trade. country to compete with the New Englard states in the immber tade.

"The cedar used to that country comes from Paragua," the large quantities of the finest quality grow. The price usially is shout 18 cents a foot, but the time I left before was so scarce and the tenund so great that it sold for 25 cents, and the tenund so great that it sold for 25 cents, and the tenund so great that it sold for 25 cents, and the tenund so great that it sold for 25 cents, and the tenund so great that it sold for 25 cents, and the tenund so great that it sold for 25 cents, and the tenund so great that it sold for 25 cents, and the tenund so great that it sold for 25 cents, and the tenund of the tenund to make the country, and at present there are at least 100 women to every man. It is good-leaking man who goes there, for he will never come back. There is a grand opening in that country, for almost, any line of manufacturing, and, as I said before, it is such a hard matter to get men to go there that cours is a supplied only in limited, a sattless. There is no one to do the work.

"A species of Brazillan pin, similar to our poplar, is also used to some extent in the manufacture of furniture. The lumb if true is constantly increasing. At times builling material is so accrete that \$120 per thousant is said for common spiruce.

A HAVEN NOT THE RISER.

A HAVEN FOI THE IRISH.

The population of Argentine Reput lie has perceptibly intreased during the past few years. Every steaming brings in hundreds of families from England, Ireland and Germany. Only a short time ago 1800 Iriels jurditle arrived on one vessel. The city of Buenos Ayrca already has a population of 550,000. O' these about 150,000 are Iralians, 5000 are English, about the same sumber are Germans, and the rest are natives, speaking the Spanish tongue. The United States is less represented than any other nation. The city has avery appearance of prospects. The stores are here the same store the same should be sufficiently structures, principally constructed of stone and wood. The shop wild was re without exception the sinest I have aver seen. Even the merchanist in New York are other Eastern clies, fall to make such displayage are seen here. The women go about in their ability still worthy of women feature particularly well worthy of mail squares or paties through the city. Then is one large part. Then one block in every these or four is reserved for apiass. The city has appearance of bring roomy and well wentlated. City property is perhaps higher than in Portland or New York, the cuts described is cheep.

There were enrolled \$51 last month and at the end of the year these would have been currelled no less than 400 if not a greater number. Without a y doubt the leannes next year will make East fortland one school district, as we have a population of 10,000. There are now thread and the state of the city. If the later are now that a subject it is saide the city, of the later are now that a made schoel will be be less than 500 and will quickly run up to 600. In addition to Stephens addition an immense section will have to be provided in the southern portion of the city including Cole's. Tilbett's addition, Fourer's addition, Brooklyn, and the arr shops, where the school facilities are limited. When the three districts are thrown into one it will revolutionize matters.

All bese matters are being carefully considered by this school directors and will certainly linduence their action in robuilding the Stophens school.
